

U-Shaped Circular Tube Bracket Circular Light

HIGH LIGHT · DURABLE · SAVE COST

BB-HJD-XXXW-R1

► Features

Structural composition:

The support part is in the form of a U-shaped circular tube, usually made of metal materials (such as steel, aluminum, etc.), which has good load-bearing and stability, and can support the circular lamp body through fixed installation or suspension; The lamp body is circular, with integrated light sources (such as LED beads), circuits, and other components to provide uniform lighting effect.

Characteristic advantages:

The U-shaped bracket design is easy to install and adjust the angle of the light body (some can be rotated and adjusted), meeting the lighting needs in different directions; The circular lamp body has uniform light distribution and a harmonious visual appearance. Paired with a metal bracket, it has strong overall durability and can adapt to various environmental conditions.

Application scenarios:

Suitable for various places, such as industrial workshops, warehouses, supermarket ceiling lighting, office area auxiliary lighting, etc. It can provide basic lighting for large spaces and also serve as a supplement to local key lighting.
