► Hand Cranked Lifting Mast (Single Wire)

- 1. Self-supporting hand lifting mast is a manual lifting mast with heavy load and reliable performance. This product consists of wire rope pulley block and hard aluminum alloy square pipe nested with each other. The lifting process is stable and reliable, and it has the function of self-locking at any position.
- 2. Its working principle is that each section of square pipe is pulled up and down at the same time by the structure of wire rope and pulley block (linkage type), and it can also be lifted by changing manual winch into electric push rod.
- 3. Lifting height, closing height, number of joints, upper, middle and lower flanges and threading can be customized according to requirements.

Specifications	Lifting Height	Closed Height	Pitch Number	Weight
SY-4-3	3m	1.3m	4 Sections	16 kg
SY-4-4	4m	1.4m	4 Sections	22 kg
SY-4-5	5m	1.6m	4 Sections	25 kg
